Statics, as well as whole study of mechanics, is the study about the actions of forces and force systems on bodies and the effects of these actions. An understanding of the characteristics of force systems and specific methods to analyse them, forms the basis to master the study of mechanics. In this chapter, we will study the action of forces and force systems commonly encountered in ...

The set up of equations for computer solutions is presented in a pseudo-language easily translated by the student into one or another computation package that the student knows. Organization We have aimed here to better unify the subject, in part, by an improved organization. Mechanics can be subdivided in various ways: statics vs dynamics, particles vs rigid bodies, and 1 vs 2 vs 3 spatial ...
